MT-INMIG-200DP

## MEGATEC INMIG 200DP

DUAL PULSE SYNERGIC FUNCTIONS TO ELIMINATE SPATTER WHILE WELDING.

Allows for activating devoted pulse curves for mild steel, stainless steel and aluminium.

### IMPROVEMENTS & FUNCTIONS

The inverter frequency is at 45kHz which significantly reduces the current requirements of the main transformer, thus improves the power consumption.

Full Synergic function on both Pulse and standard transfer mode.
